CSCI-UA 4 Computers in Principle and Practice

Prerequisite: Three years of high school mathematics or equivalent. No prior computing experience is assumed. Students with computing experience should consult with the computer science department before registering. The principles part of the course introduces basic design principles underlying a computer, including topics in hardware and software for a variety of systems. The practical component of the course seeks to enable students to use computers as a tool, no matter what discipline they study, introducing them to HTML, word processing, graphics, spreadsheets, and the World Wide Web.
